Jane Doe has made her unique program a reality for crime victims in Nowhere County and elsewhere in the U.S. She has paved the way for her nontraditional agency of advocate teams to expand across the nation. Jane's program has made an impact primarily in the field of sex crimes against young victims, but her method is now being used for victims of different crimes and ages. Jane's hard work has improved the criminal justice process for victims by bringing about a positive change of attitude in the system and much needed reforms. We are witnesses to the benefits victims receive as a

result of their association with the advocate teams.
